Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 the term "and/or" is confusing. In re Anderegg 51 USPQ 66.

Claim 5 is confusing as to whether more than one adjunctive compound is required. Amending it to recite "an antidepressant, an analgesic, a muscle relaxant ..." will overcome this rejection as this is the intent of the applicant.

In claim 6 "amphetamine" is recited twice.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagaoka et al or WO 01/26623 alone or in view of 6,395,788 or CA133:232864. Nagaoka et al (abstract) and WO 01/26623 (abstract, page 1, among others) disclose that milnacipran is used to treat FMS and symptoms associated therewith. The dependent claims differ over the reference in excluding the use of an amino acid, adjunctively administering a second compound, and reciting dosage and dosage formulation.

However, no unobviousness is seen in excluding an amino acid or adjunctively administering a second compound. The amino acid, milnacipran and the second compound are taught to be useful to treat the same condition and in the absence of a

showing of unexpected results no unobviousness is seen in either combining two compounds or omitting one compound, each of which is taught for the same use. Additionally, once a method of use of a compound is known it is within the skill of the artisan to determine the dosage and dosage formulation.
